— 2021

**App developer**  
— 2021

**Frontend developer**  
— 2020

**App developer**  
— 2020

**RPA developer**  
— 2020

#### Ublo

I worked alongside designers and other developers to build a property management solution for public lessors, using React and a REST api. I was also in charge of creating the docker containers and deploying them on AWS.

#### Wolfox

I worked in a two person team with a designer to create the best websites for various clients. Our main project was for TGEU (Trans Gender Europe) : we had to build an interactive version of the Trans Rights Map in English and Russian, on the occasion of the International Day Against Homophobia, Biphobia, and Transphobia: This is the result: <https://transrightsmap.tgeu.org/>

#### Les Capseurs

With a friend, I designed the app on Figma and built it using Flutter. This app targets students and its purpose is to assist them when playing a game called "Caps".

#### Robotic Club of IMT Atlantique

I developped a website in React to present the robot that the club is currently building to participate to the "Coupe de France de robotique" (French Robotics Cup): <https://atlantic-robotic-club.netlify.app/>

#### Student Union of IMT Atlantique

I used Flutter to develop an app to centralize all the information necessary for life on our campus.

#### Colas Digital Solutions

I designed and coded software bots to automate tasks and especially to gather the loading speeds of web pages of the company's websites.

### SKILLS

#### Web dev

- React
- HTML
- CSS / SASS
- JavaScript
- TypeScript
- Node.js
- Apollo / Express
- Graphql

#### App dev

- Flutter
- React Native
- Java for Android
- XML

#### Databases

- MongoDB
- SQL
- Neo4J
- Firebase

#### Design

- Figma
- Adobe XD
- Adobe Illustrator

#### And more...

- Python
- C / C# / C++
- Matlab
- Automation Anywhere
